PLACEMENT PREPARATION COMMITTEE

About the Company

Deloitte is one of the world's largest professional services firms, offering audit, consulting, tax, risk advisory, and financial advisory services. Founded in 1845 and headquartered in London, it operates in more than 150 countries and employs more than 470,000+ professionals. The firm helps organisations transform through technology, strategy, and innovation. Guided by its purpose to "make an impact that matters," Deloitte focuses on integrity, inclusion, collaboration, and sustainable growth. Read more>>>

Services and Solutions Offered

Assurance: Deloitte's Assurance business leverages our professional accounting, controls, internal audit, and corporate reporting skills and knowledge to deliver assurance and related advisory services across a range of financial and non-financial information, including new corporate reporting requirements, and to serve a broad range of stakeholder assurance needs. Assurance and related advisory services focus on engagements in Accounting & Reporting, Controls, Internal Audit, and Sustainability & Specialised Assurance. Read more>>>

Audit: Deloitte's Audit business includes independent External Audit services, in which the objective is to attest to or express an opinion on whether the financial statements give a true and fair view in all material respects, in accordance with the identified financial reporting framework. External Audits deliver insights that help our clients better understand how to address risks and enhance business management and financial processes and controls. Read more>>>

Business Process Solutions: Deloitte's Business Process Solutions (BPS) can help organizations identify a tailored approach, develop solutions that achieve better outcomes, and support the implementation of custom solutions to manage operational finance, HR & payroll, and tax compliance operations. From day-to-day operations to more specific projects, Deloitte's BPS can provide businesses with practical support to improve the management, oversight, and control of their operations through a flexible mix of in-house and external resources. Read more>>>

Customer-specific Services: We believe that creativity sits at the heart of any successful business transformation. And we don't just believe it, we practice it. In a world of continually changing customer expectations, we envision, realise, and scale customizable, long-term solutions that empower our clients across all industries to forge meaningful, lasting connections with their workforce, customers, and global community. Read more>>>

Cybersecurity: Deloitte uniquely understands your business, its challenges, and its opportunities. Our powerful solutions simplify complexity, accelerate innovation, and supercharge transformation. This enables you to operate with resilience, grow with confidence and secure success for your organisation. Read more>>>

PLACEMENT PREPARATION COMMITTEE

Deloitte Private: Deloitte Private connects leaders of privately held businesses, family enterprises, and emerging growth companies with ideas, knowledge, and experience curated specifically for your private enterprise's unique needs. We are dedicated to building professional relationships that can help you unlock your fullest potential and thrive for years to come. Read more>>>

Engineering, AI & Data: Organisations are facing unprecedented challenges and evolving technological disruptions. To drive progress, harness the power of Deloitte's Engineering, AI & Data services to drive product and service enhancements, achieve efficiencies, improve financial performance, and accelerate speed to market. Read more>>>

Enterprise Technology & Performance: When it comes to enterprise technology, Deloitte's Enterprise Technology & Performance (ETP) services drive functional excellence and enable innovation and long-term growth. Working across finance, supply chain, and IT operations, we deliver a holistic approach to performance improvement and digital transformation, helping you get the most out of your investment. Alongside leading solution providers, our practitioners combine strategy, process design, technology enablement, and operational services to drive efficiency, innovation, and sustainable growth, empowering your organisation's progress. Read more>>>

Finance Transformation: In an increasingly challenging environment marked by disruptive tech like AI, market uncertainty, and regulatory change, finance and global business services leaders recognise the opportunity to better serve the enterprise, shareholders, customers, and regulators.

Deloitte helps you navigate this complexity by bringing deep industry insights and integrated solutions to achieve your business objectives. We can support with:

- Evolving your financial and management reporting
- Reimagining your finance and enterprise operating models
- Modernising and innovating your finance tech and data solutions

Read more>>>

Global Employer Services: Cross-border or domestic, large or small, mobilising a workforce can be complex for any organisation. Workforce mobility is changing, and maintaining mobility compliance is crucial to achieving progress. Our network of more than 7,000 professionals in 150 countries understands the challenges you face. Our team is your team, fully dedicated to your business and committed to delivering value. Our trusted advisors understand the new world of mobile working and bring a unique approach to reward, compensation, and mobility tax. Together we can dial up the possibilities. Read more>>>

Human Capital: We collaborate using a data-driven scientific approach to unlock human potential by bringing our full suite of human capital capabilities. This allows us to drive new value and drive better results, supporting you in achieving long-term goals. By placing humans at the centre of successful

transformations, we build future-focused organisations together. Ready for both today's challenges and tomorrow's opportunities. Read more>>>

Legal: Combining business experience and legal excellence, we deliver comprehensive solutions designed to address the evolving needs of the Chief Legal Officer. Read more>>>

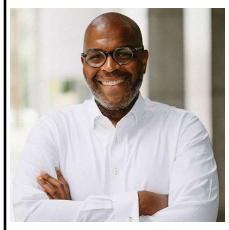

Risk, Regulatory & Forensic: With increasing regulation and technology-driven corruption, potential threats to your business's reputation and value are widespread and continually evolving. We can help you simplify and accelerate the building, operating and sustaining of right-sized risk and compliance capabilities, whether in response to a specific event or planning for the future. Read more>>>

Strategy & Transactions: Catalyse your business growth and bring your strategy to life under the trusted guidance of our strategy, M&A, valuation, infrastructure and sustainability advisors. Whether your growth plans are organic or inorganic, or you are seeking support across infrastructure, sustainability, or turnaround projects, we assemble a team of cross-market professionals to deliver end-to-end support tailored to your needs. Read more>>>

Tax: Tax doesn't need to be complicated; progress begins with simplifying processes. We provide tax compliance, advisory, and implementation services on a global scale, catered to your unique needs. Alongside you and your team, Deloitte delivers experience, technology and innovative ideas, guiding you through complexity with confidence. Read more>>>

Business Values

Lead the Way
Deloitte aims to be a pioneer in innovation and sustainability, constantly reinventing its practices to address emerging business and societal challenges. The firm sets industry standards through foresight and responsible growth.

Serve with Integrity
Integrity is central to Deloitte's culture, emphasising honesty, transparency, and ethical behaviour in all engagements. This commitment builds lasting trust with clients, regulators, and communities.

Take Care of Each Other
Deloitte fosters a supportive environment that prioritises well-being, fairness, and personal growth. The firm values teamwork and ensures that every individual feels respected and empowered to succeed.

Foster Inclusion
The organisation promotes a culture of diversity, equity, and belonging, where all voices are heard and valued. Deloitte actively challenges barriers to equality and drives inclusion at every level.

Collaborate for Measurable Impact
Through global teamwork and cross-industry collaboration, Deloitte strives to create tangible, data-driven results. Its goal is to deliver measurable value for clients and make a positive impact on society.

PLACEMENT PREPARATION COMMITTEE

Company Case Studies

Modernising an airline without disrupting the journey: Deloitte helped a major US airline modernise its 60+-year-old mainframe Passenger Service System, which handles booking, check-in, and baggage. Earlier modernisation attempts had stalled due to silos, waterfall delivery, and hidden code dependencies. Using AI-augmented Ascend Mainframe Modernisation, Deloitte mapped the legacy codebase in a day, a job that had taken the airline's teams weeks. It then implemented a phased, incremental plan that migrated the mainframe to cloud-native microservices without downtime. Airline leaders estimate over $300M in annual cost savings, and a GenAI mainframe emulator pilot for 55,000+ agents cut training time by about 30%. Read more>>>

A bank's software developers can't get by on speed alone: A global bank wanted faster, higher-quality code, but its teams used inconsistent tools and processes across the software development life cycle (SDLC). Deloitte deployed Ascend Agentic SDLC in an 8-week proof of concept with about 15 participants. GenAI was embedded across roles, from user stories and architecture to unit tests and QA. Productivity rose by 53% across the SDLC tasks tested, with less time spent in meetings, higher test coverage, and a better talent experience. Other business lines are now considering the same transformation. Read more>>>

Back-to-back Formula 1 Constructors' Championships are won with split-second decisions: Deloitte worked with McLaren's F1 team to build a simulation system that supports in-race strategy calls such as pit timing, tyre choice and number of stops. It runs thousands of race simulations per second, inside F1's cost cap. Telemetry from cars reaches engineers at the McLaren Technology Centre in as little as 52 milliseconds. The approach augments human judgment instead of automating it. McLaren won the 2024 and 2025 Constructors' Championships, its first since 1998. Deloitte positions the same simulation approach for other industries. Read more>>>

CFOs as transformation architects: Deloitte and HPE envision a new era in AI-driven finance: Hewlett Packard Enterprise's CFO wanted to move finance from backwards-looking reporting to forward-looking enterprise intelligence. Starting in 2025, HPE and Deloitte co-developed CFO Insights ("Alfred"), which combines agentic and generative AI on Deloitte's Zora AI platform and runs on HPE Private Cloud AI. It replaces static executive reports with an interactive platform that queries roughly 300 million line items of HPE data in near real time. Deloitte, NVIDIA and HPE reengineered the underlying NVIDIA NIM building blocks so the AI gives the same answer every time the same question is asked. Fortune (Feb 2026) reports about a 40% cut in reporting cycle time and at least 25% lower processing costs. HPE is the first Deloitte client to deploy it. Read more>>>

PLACEMENT PREPARATION COMMITTEE

Key Competitors

McKinsey & Company	McKinsey is a top-tier management consulting firm, advising clients on strategy, operations, and digital transformation. It works with global corporations, governments, and non-profits across 65+ countries. Renowned for its data-driven insights and problem-solving, McKinsey helps organizations achieve sustainable growth and long-term impact. The firm has expanded into areas like AI, climate change, and digital innovation. Known for its strong analytical rigor and research-backed approach, it's a leading advisor to CEOs and policymakers. McKinsey's thought leadership and global influence make it one of the most respected firms in consulting.
BCG	BCG is another global strategy powerhouse, often competing directly with EY-Parthenon in high-level corporate strategy, innovation and organizational transformation. Known for its deep research culture and future-oriented thinking, BCG has invested heavily in digital capabilities (through BCG X) and has become a leader in advising on climate change, ESG and sustainability strategies. BCG often partners closely with leadership teams on restructuring, digitalization and new business models, before handing over longer-term execution to in-house teams or external partners.
pwc	PwC is one of the world's largest professional services firms, offering audit, tax, consulting, and advisory services. It helps organizations drive growth through digital transformation, cybersecurity, and ESG initiatives. With operations in over 150 countries, PwC serves clients across industries such as finance, healthcare, and technology. Its strategy, *The New Equation*, focuses on building trust and delivering sustained outcomes. PwC is known for its strong financial advisory and digital innovation expertise. It continues to invest heavily in AI and cloud-based solutions to enhance decision-making and client experience.

PLACEMENT PREPARATION COMMITTEE

	EY provides services in assurance, consulting, strategy, tax, and transactions to help businesses improve performance and manage risks. It emphasizes innovation, technology integration, and sustainability to drive client growth. Its consulting arm, EY-Parthenon, offers strategic and analytical insights to global clients. Operating in over 150 countries, EY focuses on long-term value creation and inclusive growth. The firm's purpose is to "build a better working world" through trust and transformation. EY also champions entrepreneurship and digital readiness through global initiatives like *EY Entrepreneur of the Year*.
	KPMG offers audit, tax, and advisory services, specializing in risk management, governance, and compliance solutions. It helps organizations enhance performance through data analytics, digital transformation, and ESG reporting. The firm has strategic alliances with Microsoft, Oracle, and Google Cloud to strengthen its technology delivery. Operating in more than 140 countries, KPMG blends deep industry knowledge with digital capabilities. It's recognized for its financial risk and regulatory consulting expertise. KPMG also focuses on building trust and accountability in businesses through transparency and sustainability initiatives.

PLACEMENT PREPARATION COMMITTEE

CSR Initiatives

Deloitte's global CSR framework is guided by its purpose of *"making an impact that matters."* The firm integrates social responsibility into its core business strategy, focusing on long-term societal and environmental impact through structured initiatives and partnerships.

Umbrella: WorldImpact
WorldImpact is Deloitte's CSR portfolio, covering education and skills-building, sustainability, and inclusion. Read more>>>

WorldClass (education/skills):
The target is to reach 100 million people by 2030 through education partnerships, volunteering and donations. Read more>>>

WorldClimate (climate):
Net-zero by 2040 is the goal, requiring collaboration across Deloitte and its value chain.
Read more>>>

Inclusion (DE&I):
The Middle East firm cites 90+ nationalities and supports underrepresented groups.

PLACEMENT PREPARATION COMMITTEE

Sustainability Initiatives

1. **Transitioning to net-zero**

   When it comes to replacing fossil fuels with low-emission energy sources, shared prosperity is key. To decarbonise, a mix of solutions is required. From investment and guiding policy pathways to implementing innovation across energy systems, Deloitte can help governments, organisations and sectors to respond. Through data-driven modelling, adoption of emerging technologies and proprietary perspective, we help to accelerate toward a carbon-neutral approach.

2. **Accelerating governance, accountability and transparent reporting**

   Compliance obligations and driving sustainability transformation can go hand in hand. Deloitte offers cutting-edge technology underpinned by Industry-leading knowledge to help clients meet short-term compliance obligations while preparing for long-term transformation. Through impact assessments, readiness and assurance and stakeholder reporting, we enable compliance while unlocking value creation.

3. **Enabling responsible supply chains and operations**

   Transforming supply chain operations can deliver greater transparency and offer paths to improved sustainability outcomes. Deloitte can help to lead the end-to-end transformation, enhancing visibility and pioneering cohesive technology and services efforts to support a transition from a linear to a circular economy.

4. **Managing climate adaptation and resilience**

   In the face of climate adaptation and resilience challenges, fostering sustainable practices and fortifying infrastructure are key. From strategic planning and policy alignment to executing innovative Solutions across environmental systems, Deloitte stands ready to support governments, organisations and sectors in their sustainability journeys. Utilising data-driven forecasting, emerging technologies and exclusive viewpoints, we can help expedite a robust and adaptable approach to a climate-resilient future.

5. **Financing the climate transition**

   When financing the climate transition, inclusive growth and equitable investment are paramount. From providing strategic financial advice and shaping policy trajectories to driving innovation in sustainable finance, Deloitte can aid governments, organisations and sectors in their approach. Leveraging data-informed analysis, cutting-edge technologies and insights, we can help expedite a financially sound approach to a low-carbon future.

PLACEMENT PREPARATION COMMITTEE

6. **Advancing nature and biodiversity**

   Everything depends on nature. Be it food, water, air, precious metals and more, businesses and communities rely on nature for each facet of life. On the road to net-zero, it's key to unlock hidden value, restore biodiversity, harness natural capital and help drive sustainable financial returns. Explore new product design, emerging markets, and business models with Deloitte's connected insights.

7. **Achieving climate equity and a just transition**

   If fairness, equity and inclusion are placed front and centre, a just transition can benefit each of us. People are at the heart of transitions, and when decision-making is driven by purpose, meaningful progress can be achieved. In this shift to a sustainable, environmentally balanced economy, there is an opportunity to help unleash human potential, enhance social value and drive competitive advantage.

Questions

HR / Behavioural Questions

These questions are asked across all profiles to assess your personality, motivations, and cultural fit.

1. **Personal & Background**
   - Tell me about yourself
   - What are you passionate about outside of work?

2. **Education & Career Path**
   - Walk me through your CV
   - Why MBA?
   - Why Consulting after Engineering?

3. **Career Goals & Motivation**
   - Why are you interested in a career in consulting?
   - Where do you see yourself in 5 years? What are your long-term career goals?

4. **Skills & Personality**
   - What are your greatest strengths and weaknesses?
   - Describe a time you faced a major challenge in a team and how you handled it
   - Tell me about a time you had a conflict with a team member. How did you resolve it?
   - Describe a situation where you had to learn something new in a very short amount of time

5. **Aspiration & Fit**
   - Why Deloitte specifically? What do you know about our work?
   - Do you have any questions for us?

Technical Interview Questions asked to different candidates

PGP 24

1. **B. Tech with 35 months' experience**
   - Market entry case
   - guesstimate of the number of cars sold in India
   - Profitability case of an FMCG company - Focus was on understanding the supply chain and covering all elements of the supply chain to find the issue
   - Questions on work experience

PGP 23

1. **B. Tech with 24 months' experience**
   - What is lead time? How does it impact the business, and how can it be reduced?
   - List the frameworks for market entry (a situation was given)
   - Caselet on AI marketing
   - Guesstimate the number of electronic toys sold in Haryana annually

PLACEMENT PREPARATION COMMITTEE

2. **BBA with 25 months' experience**
    - M&A case involving one consumer durables company looking to acquire another, with a focus on the acquisition's implementation plan.
    - Estimate the annual number of online grocery orders in India.
    - Discuss how to value a company, given my experience in equity research
    - Provide use cases for Generative AI

3. **B. Tech with 24 months' experience**
    - Mini Case with a guestimate: AI in Marketing
    - Case on Profitability: Majorly focused on the value chain
    - Prioritise the daily tasks: Client PPT, Market Insight report, financial analysis, proposal and planning office party. Prioritise the suggestion to the client.
    - Estimate the market size of Solar Panels in India

PLACEMENT PREPARATION
COMMITTEE

Sample Guesstimates & Cases

Guesstimates:

1. **Estimate the annual market size of packaged drinking water in Mumbai**
   Recommended Approach: Population → Households/Income Segments → Daily consumption (own use + offices) → Packaged share (cans, bottles, RO) → Price per litre

2. **Estimate the number of EV stations in India.**
   Recommended Approach: Total EVs → Vehicle Segments (2-wheelers, cars, buses) → Share using public charging → Charging frequency per vehicle → Capacity per station → Number of EV charging stations

3. **Estimate the number of tourists in Shillong**
   Recommended Approach: Shillong population → Domestic vs. foreign tourists → Tourist arrival rate (daily/annual) → Average length of stay → Adjust for repeat visits and day-trippers

4. **How many cups of chai are sold in India per day?**
   Recommended Approach: Adult population → Tea drinkers → Cups/day by urban/rural → Home vs. out-of-home → Cross-check with tea consumption (kg) ÷ tea per cup

5. **Estimate the annual revenue of a Deloitte-sized consulting office in Gurugram (~2,000 people)**
   Recommended Approach: headcount by level → billable ratio → utilisation → blended billing rate/day → working days

6. **Estimate the number of Netflix subscribers in India**
   Recommended Approach: Indian population → Smartphone/internet users → Netflix awareness and accessibility → Target audience by income/age → Share preferring paid OTT platforms → Netflix's market share → Average users per subscription (individual vs. family plans)

7. **Estimate the number of AI images created using GPTs**
   Recommended Approach: Total ChatGPT users → Share using image-generation features → Average image-generation sessions per user per month → Average images generated per session → Monthly image-generation frequency → Extrapolate to annual volume (if required)

PLACEMENT PREPARATION COMMITTEE

Cases:

1. **The regional airline is losing money**
   Revenue down 15%, costs up 8% over 2 years
   Why is this happening, and what should they do to return to profitability within 18 months?

2. **Global fast-food chain entering India**
   Our client is a global fast-food chain. Should it enter India, and if yes, how (mode, cities, menu, timeline)?

3. **PE fund evaluating acquisition of a mid-size NBFC**
   A PE fund is evaluating an acquisition of 100% of Kavach Finance, a mid-sized NBFC. The promoters are asking ₹2,200 cr. Should the fund proceed, and at what price? The fund's hurdle is 20% IRR over 5 years

4. **The FMCG company's sales are stagnating in rural India**
   Our client's rural sales have been flat for 3 years, while the market has grown by ~8%. What's causing this, and what should they do to hit 12% growth over the next 2 years

5. **Manufacturing plant with 30% higher cost per unit than peers**
   Our client's plant has a per-unit cost 30% higher than that of its industry peers. Identify the drivers and recommend how to close at least half the gap within a year

6. **E-commerce company facing scalability and reliability issues with on-premise servers**
   The client's on-premise infrastructure cannot scale to meet growing demand and recently experienced a 12–14-hour outage during a peak-load period. Identify the key risks and operational blockers, and recommend a migration strategy to improve scalability, reliability, and business continuity

7. **AI adoption strategy for a traditional US insurance company**
   A US-based insurance company relies entirely on manual processes and has not adopted any AI solutions. Develop an AI adoption roadmap by identifying high-impact use cases, evaluating benefits and risks, and recommending an implementation approach

8. **Modernising a monolithic application into microservices**
   The client operates a monolithic application that is becoming difficult to scale, maintain, and update. Develop a migration strategy to transition to a microservices architecture while minimising operational disruption, cost, and implementation risks

9. **Selecting an automation solution for a medium-sized bank**
   A medium-sized bank specialising in small-ticket loans wants to automate its traditionally manual processes and reduce turnaround time (TAT). Identify the key parameters for selecting a software solution and recommend an approach that balances efficiency, cost, scalability, security, and regulatory compliance
