SUGGESTIVE PPT QUESTIONS

- How are projects allocated across Advisory, Assurance, Tax and Business Services?
- What training is provided on PwC methodologies, AI tools, data privacy and quality standards?
- How much exposure do we receive to global client teams and cross-border collaboration?
- What distinguishes high-impact deliverables in a virtual client-service environment?
- How is generative AI changing entry-level work while preserving professional judgement and quality?

ABOUT THE COMPANY

PwC is a global network of firms that helps clients build trust and reinvent across audit and assurance, tax and legal, deals and consulting. PwC Acceleration Centers are tech-enabled global talent hubs that support PwC client teams virtually across lines of business. PwC AC India brings together professionals working across Advisory, Assurance, Tax and Business Services through global collaboration, hands-on learning and technology-enabled delivery. ***Read More >>>***

SERVICES OFFERED

- **Advisory:** Support for consulting and transformation work, including technology, data, risk, deals and operations roles depending on the opportunity
- **Assurance:** Audit and assurance support enabled by technology, automation and PwC's evolving Next Generation Audit capabilities
- **Tax:** Tax and legal-services support within PwC's global lines of business, subject to role and jurisdiction
- **Business Services:** Internal and enabling functions including finance, operations, legal, risk and ethics, people, technology and communications roles

PREPARATION TIPS FOR CANDIDATES

Common Interview Rounds

- **CV and Motivation:** Walk through key choices, impact and why PwC AC
- **Behavioural:** Use STAR for teamwork, ownership, conflict, ambiguity and ethics
- **Business Case:** Structure the problem, state assumptions, prioritize analysis and close with a recommendation
- **Technical:** Revise role-specific fundamentals, Excel/data skills, accounting or domain concepts
- **Digital Mindset:** Be ready to discuss responsible AI use, data quality, confidentiality and human judgement

Sample Questions

- Tell me about yourself and why PwC Acceleration Centers?
- Describe a time you worked with multiple stakeholders under a tight deadline.
- How would you check the quality of analysis before sharing it with a client team?
- When should a team automate a process, and what risks should it assess?
- Tell me about a time you received difficult feedback and acted on it

Sample Cases

- A global client wants to reduce finance-process cycle time while improving controls; Diagnose and recommend
- An audit team finds inconsistent data across systems; Design a validation and escalation approach
- A service operation faces rising workload and uneven quality; Prioritise people, process and technology levers
- A company plans to deploy generative AI in customer service; Build a value, risk and governance framework
