

From ideas to outcomes – Consulting for what's next!

© 2026 Infosys Consulting

Your curiosity and your hard work got you this far

- You built a foundation that taught you to analyse problems, think critically, and work with a team to identify solutions
- You are ready to apply your education and your drive to make a real difference in the world
- But your learning is not over; this is only the beginning, and this is when passion takes hold
- The digital future is generating new problems to be solved, new technologies to be applied, and new value to be created

Put your education and your passion to work at Infosys Consulting!

- Continue your learning and grow as part of a team of bright, highly motivated consultants. Tackle challenges across a range of industries and disciplines; leverage technology to create efficiencies and drive unprecedented value
- Infosys Consulting, the management consulting unit of Infosys, drives innovation for many of the world's largest and most respected brands. In an entrepreneurial setting with the resources of a global firm, our unit offers consultants an unparalleled opportunity to tackle the most important challenges facing companies today. We help organisations reimagine their future and create sustainable business value
- Infosys Consulting has been ranked among the World's Best Management Consulting Firms in 2026 by Forbes, for the third year in a row

Join a team where your passion and your work become one

Our teams sit at the intersection of industry, people, process, and technology which makes us uniquely positioned to deliver immediate value to C-suite stakeholders. We leverage the unique skills of each practice to:

- Create pragmatic strategies that leverage the full potential of disruptive technologies such that organisations stay competitive, win new markets, and increase shareholder value
- Implement each tailored strategy using a combination of leading-edge and time-tested methodologies to drive measurable and lasting results
- Help large clients realise sustainable change within by using a combination of innovative and human-centric approaches

To meet the changing demands of clients, Infosys Consulting is building the organisation of the future across **seven industry practices:**

- **Communications, Media and Technology**
- **Consumer Goods, Retail & Logistics**
- **Digital – Services, Utilities, Resources and Energy**
- **Financial Services**
- **Insurance**
- **Life Sciences and Healthcare**
- **Manufacturing**

and **three horizontal practices:**

Enterprise AI

Tech Transformation

Workforce Transformation

Organization Change Management (OCM)

Learning Solutions Group (LSG)

Who are we?

- **Infosys** (NYSE: INFY) is a global leader in AI-first business consulting and digital services, with annual revenues of **$20.16B** as of March 31, 2026. We enable clients across more than 60 countries to navigate digital transformation, stay ahead of emerging business trends and outperform the competition.
- **Infosys Consulting** is the business consulting arm of Infosys. With an AI-first mindset, we drive business value from strategy through execution for our clients. We have offices across the US, Europe, Asia Pacific, and India. We are deeply committed to building a workplace where everyone feels valued, respected, and empowered; driven by a strong culture of diversity, equity, and inclusion.
- **India** is one of the largest and fastest-growing regions for Infosys Consulting, delivering sustained double-digit growth annually over the past five years. Our dynamic and versatile consultants in India lead large-scale, high-impact consulting engagements for clients around the world and their GCCs in India.

What sets us apart?

At Infosys Consulting, we believe that sustainable outcomes are built on strong, trusted relationships. From clients who rely on us to navigate their most complex challenges to the talent that powers our growth, we have established a distinctive position in the industry by:

- **Adopting an AI-first approach by design**: We embed AI-led design thinking in every solution we offer. From native to proprietary platforms, we are reimagining our offerings with a hands-on, practical approach - with AI as its foundation.
- **Driving strategy through execution:** We go beyond playbooks and frameworks; we design target states and operating models and then see them through by delivering integrated workforce, process, and technology solutions that achieve both regulatory and business outcomes.
- **Delivering with deep domain expertise:** We drive all our programmes on the foundation of deep domain expertise and hands-on delivery across banking, payments, wealth, and capital markets, risk & compliance areas.
- **Fostering an inclusive workplace where every perspective is considered:** With a strong learning and apprenticeship culture, where ideas are genuinely valued and every voice shapes the work. Inclusivity here isn't a policy - it's how we operate.
- **Running dedicated mentorship programmes**: Our leaders are personally invested in coaching our consultants through dedicated mentorship programmes to develop future-ready professionals.

Our Practices

Communications, Media and Technology

Our **Communications, Media and Technology** (CMT) practice is committed to serving leading global firms across the Communications, Media, Hi-Tech and Software Platform sectors. In an era defined by rapid technological advancement, evolving business models, industry consolidation and AI-driven transformation, we partner with our clients to navigate complexity and unlock new sources of growth.

We specialise in advising clients on the design, definition and execution of strategic transformation initiatives, with a focus on the following areas:

- **Customer Experience and Growth**: Leveraging data-driven insights and personalisation at scale to drive customer engagement and revenue acceleration.
- **Network Transformation:** Supporting clients through the full lifecycle of Network transformation—from strategic planning to operational execution.
- **Deal Optimisation**: Enabling successful mergers and acquisitions through future-state organisation design and integration planning.
- **Innovation in Telecom and Hi-Tech**: Co-creating new service offerings and business models to help clients stay ahead in a dynamic marketplace.
- **Technology-Led Transformation**: Establishing AI Centres of Excellence and driving process innovation to enhance operational efficiency and competitiveness.

We look for individuals who are passionate about technology, business transformation, solving client challenges and aspire to shape the future of Communications, Media, and Technology industries.

Consumer Goods, Retail & Logistics

We provide consulting services to clients in Retail (offline and online retailers), Consumer Packaged Goods, and Logistics (Rail Roads, Ground Logistics, Shipping Lines etc.) domains. The following are the areas of expertise that we offer to our clients:

- **Retail & CPG Processes**: Retail Planning and Buying, Merchandising & Category Management, Store Operations, Omni Channel Commerce, Retail Execution, New Product Development, Marketing, R&D, Supply Chain & Distribution
- **Digital/Sustainability:** Campaign Management, Digital Analytics, Loyalty Management, Net Promoter Score, Social-Media, Customer Relationship Management, AI & Blockchain in Digital, Digital Mobility, Digital PLM, Digital Workplace, Circular Economy, Renewable Resources
- **Logistics:** Planning, Optimisation, Modernisation, Shipping Operations, Warehouse Management, Transportation Management, Air Cargo, Ocean Freight, Order Management
- **Trade Promotion Management:** In-Store Displays, Pricing Discounts, Bulk Purchases, Sales Competition

© 2026 Infosys Consulting

- **Master Data Management:** BI and Analytics, Cloud Services, Big Data, Data Management
- **ERP & Platforms:** IT Strategy & ERP Transformation, Inventory Management, Scalability, End-To-End Business Solutions
- **Agile PO / PM:** Product Owner, Product Management, Project Management, Stakeholder Management
- **Analytics and Advanced AI**: We help clients in identifying business opportunities by leveraging data analytical capabilities using advanced AI.

We are seeking talented professionals with expertise across Retail, Consumer Packaged Goods (CPG), and Logistics domains, complemented by capabilities in digital transformation, analytics, AI, supply chain, ERP platforms, master data management, and agile delivery. Experience working with leading business platforms, whether from an end-user, business, or implementation perspective, will be advantageous, along with strong problem-solving, stakeholder management, and communication skills to drive business transformation and client value.

Digital – Services, Utilities, Resources and Energy

We work with global leaders in Oil & Gas, Renewables, Utilities, Mining, and related services to deliver strategic transformation initiatives. Our engagements span North America, Europe, the Middle East, and Asia Pacific, offering diverse consulting opportunities.

Our consulting leverages technology to drive outcomes across Business Process Re-engineering, Digital Strategy, Automation, Change Management, Product Selection, Business Analysis, and Agile Transformation.

  - Tools & Platforms: SAP S/4HANA, Maximo, Bentley Systems, Dassault Systèmes
- **Trading & Risk Management (ETRM/CTRM)**: Energy and commodity trading, risk analytics, compliance
  - Tools & Platforms: Endur, Allegro, OpenLink, Eka, SAP TRM
- **Data, Digital & AI Enablement**: ERP, Data analytics, Data engineering, Gen AI, Agentic AI, Advanced analytics
  - Tools & Platforms: S/4HANA, Salesforce, Azure OpenAI, AWS Bedrock, Power BI, DataBricks, Palantir
- **Process Transformation**: Process discovery, automation, and benchmarking
  - Tools & Platforms: ARIS, Signavio, Celonis

© 2026 Infosys Consulting

- **Technical Program Management**: Agile delivery, Governance
- **Certifications:** PMP, PRINCE2, SAFe Agilist, CSM
  - Tools: Jira, Confluence, MS Project, Rally, Azure DevOps
- **Taxation:** Indirect Tax, Direct Tax, Technology implementation and configuration
  - Tools & Platforms: SAP Tax, OneSource, Vortex
- **Airlines:** Airline operation, Scheduling, Customer Experience

We are looking for individuals who thrive on solving business challenges, can translate ideas into actionable outcomes, and are eager to work at the intersection of strategy, transformation, and innovation. The ideal candidate should possess strong communication skills, a collaborative approach, and the ability to build trusted relationships with clients and teams across global environments.

Enterprise AI

Enterprise AI is at the forefront of helping organisations transform into AI-First enterprises. Our mission is to deliver value-driven advisory, innovation, and transformation services that enable clients to unlock growth, enhance customer experience, optimise costs, and create sustainable business outcomes through AI, data, analytics, and automation.

We partner with leading organisations to shape enterprise-wide AI strategies, modernise data ecosystems, accelerate digital transformation, and translate emerging technologies into measurable business value. Working across industries and geographies, we combine strategic thinking, deep domain expertise, and cutting-edge innovation to help clients reimagine the future of business.

Key Focus Areas

- Advise organisations on AI, data, and analytics strategies, helping define transformation roadmaps and realise measurable business value
- Enable data-driven enterprises through data transformation, modern data management, governance, and data advisory services
- Design and implement AI-powered operating models, transformation offices, and value realisation frameworks for large-scale business transformations
- Deliver consulting and innovation engagements across AI, Generative AI, Conversational AI, Agentic AI, analytics, and data for clients across industries including Financial Services, Consumer & Retail, Telecom, Utilities, and Energy
- Drive Responsible AI adoption through governance frameworks, policies, risk management, and implementation support
- Solve complex business challenges using innovative problem-solving thinking, advanced analytics, and emerging AI technologies
- Develop innovative AI assets, accelerators, and solutions that help clients move from strategy and experimentation to enterprise-scale adoption
- Collaborate with leading academic institutions, technology partners, and startups to bring cutting-edge innovation to clients

© 2026 Infosys Consulting

- Offering strategic insights into AI and emerging technologies, with a strong focus on real-world applications in critical business domains

We are seeking individuals who are passionate about harnessing the power of AI, data, and emerging technologies to solve complex business challenges, drive innovation, and help organisations unlock sustainable value in an AI-first world.

Financial Services

The Financial Services practice partners with renowned global financial services firms across all major financial centres. We advise our clients on their strategic innovation, growth, and performance improvement priorities such as:

- Defining blueprint for future state business models, new product offerings or enhancing operating model leveraging Digital and AI
- Reimagining customer and employee experience using design thinking and Infosys proprietary frameworks such as service design
- Digital transformation of core platform for driving growth, efficiencies and cost optimization objectives
- Designing optimal process architecture through process re-engineering leveraging AI, analytics, and automation
- Realizing benefits of M&A through effective integration of policy, people, processes and systems
- Improving business resilience and compliance through defining solutions for regulations and designing effective business controls
- Program management of large strategic programs
- Accelerating product innovation by shaping customer-centric product strategies, defining MVP roadmaps, and driving end-to-end product lifecycle execution
- Design, establish, and scale future-ready Global Capability Centres that evolve into strategic engines of innovation, talent, and business transformation

Our consultants work in cross-cultural engagement teams across regions in the following domain areas:

- **Banking**: Retail banking, commercial banking, SMB & Merchants Banking, Transaction banking (including trade finance, cash management and payments), treasury, core banking transformation, operations optimization
- **Channels and Distribution**: Omni-channel, open banking and conversational banking
- **Governance, Risk and Compliance**: AML, KYC, client onboarding, regulatory change management, regulatory reporting, anti-financial crime, risk management, Fraud Management
- **Capital Markets**: Investment banking, private banking, wealth management, market infra, retirement services

We're looking for intellectually curious, analytical problem-solvers who are passionate about Financial Services. The ideal candidate should have a consulting mindset, strong communication skills, and an interest in Banking, Capital Markets, Risk & Compliance to solve complex business challenges and drive transformation.

© 2026 Infosys Consulting

Insurance

The Insurance Practice partners with leading global insurers, reinsurers, and insurance brokerages to transform their businesses across strategy, operations, technology, data, and risk management.

Our consultants' partner with global insurers and brokerages to transform their businesses through strategy, operating model redesign, process optimization, core system modernization, and AI-driven innovation. By addressing challenges across product development, distribution, underwriting, policy administration, claims, and customer service, we help clients navigate industry disruption and achieve long-term growth

- **Insurance Lines of Business:** Property & Casualty Insurance (Commercial Lines, Specialty Lines, Personal Lines), Life Insurance, Group Benefits, Retirement Services, Annuities, Wealth & Retirement Solutions, Insurance Brokerage
- **Insurance Operations:** Product Development, Distribution & Agency Management, Sales & Marketing, New Business Processing, Underwriting, Policy Administration & Servicing, Billing & Collections, Claims Management, Customer Service, Producer Lifecycle Management (Licensing, Contracting & Compensation), Regulatory & Compliance
- **Digital Insurance Transformation:** Core Insurance Platform Modernization, Digital Customer Experience, Omni-channel Distribution, Intelligent Automation, Data & Analytics Transformation, AI-led Business Transformation, Cloud-enabled Operating Models
- **Insurance Strategy & Consulting:** Business Strategy, Operating Model Design, Process Transformation, Customer Experience Enhancement, Cost Optimization, Business Analysis, Program & Change Management, Post-Merger Integration

We seek future consultants who are excited by the opportunity to work at the intersection of insurance, business transformation, technology, and artificial intelligence. Candidates should demonstrate intellectual curiosity, leadership potential, structured problem solving, strong communication skills, and a commitment to deliver excellence for clients

Life Sciences & Healthcare

Our practice works across pharmaceutical value chain and with world's leading Life Sciences organizations. We are the innovators and creators of unique solutions to solve some of the most pressing business challenges. We learn, adopt and implement thought leadership and best practices to transform our clients' business, technology and processes with AI interventions.

- **Core Domain Areas:** R&D (Clinical, Regulatory, Pharmacovigilance), Compliance, Manufacturing, Commercial, and Quality domains complemented by Integrated Business Transformation capabilities across Mergers & Acquisitions (M&A), Operating Model Transformation, Change Management, Learning, and Data & Analytics. We help clients reimagine business processes, design and implement techno-functional solutions, and realize sustainable business value.
- **Digital transformation and data analytics:** Reimagine the digital experience for the user community across the value chain (information systems integration of process, quality, supply chain), data visualization, and advanced analytics applied for predictive and cognitive capabilities

© 2026 Infosys Consulting

- **End to End Transformations:** We bring in multiple stakeholders together to transform the operating models and services purely driven by data driven decisions. We embark on this journey through our Projects, Products, Portfolios excellence and Value Realization Frameworks
- **Disrupting Business Model:** We adopt a transparent and performance driven culture and challenge existing practices to lay the foundation for automated and efficient operations
- **New Opportunities:** Envisioning opportunities with the application of innovative technologies (AI/ML, Digital Initiatives) to Pharmaceutical, Medical device, Generics and Biosimilar industries across global markets

We are looking for curious, analytical, and adaptable individuals who are excited to solve complex business challenges. The ideal candidate should demonstrate strong problem-solving and communication skills, a collaborative mindset, and a passion for learning and driving innovation. Candidates should be comfortable working in dynamic environments and leveraging data, technology, and AI-led solutions to deliver business value. Prior experience in Life Sciences is **NOT mandatory**.

Manufacturing

We provide consulting services across to global clients from various industries including Discrete Manufacturing, Process Manufacturing, Automotive and Automotive OEM, Aerospace OEM, and Industrial Manufacturing in the following domains and functions:

- **Supply Chain Operations:** Supply Chain Planning, Sourcing & Procurement, Order Management, Supplier Performance, Inventory Optimisation, Distribution, Supply Chain Risk Management, Manufacturing Operations, Manufacturing Execution, Warehouse & Transportation, Predictive Maintenance
- **Customer Operations:** Order Management, Customer Relationship Management, After Sales Services, Customer Master Data Management, and Customer Journey Enhancement
- **Product Operations:** Product Lifecycle Management, Item Master Data Management
- **Horizontal domains:** Transformation to digital supply chain, supply chain performance reporting and analysis, advanced data analytics, IT transformation and Shared Service establishment for manufacturing companies, agile program management, merger, acquisition, and divesture
- **Support to other verticals:** Change Management during Process and Technology Transformation; Tool led Automation in Business Processes
- **Leverage Gen AI:** Ability to engage in conversations with clients about AI interventions to address complex business challenges for Manufacturing organizations
- **ERP Transformation:** Supply Chain focused ERP led digital transformations ensuring business process optimisation, Data management, Change management

We seek curious, analytical, and adaptable individuals who enjoy solving complex business challenges. Candidates should be eager to learn new industries and domains, embrace AI and emerging technologies, and be flexible to travel based on client needs.

Tech Transformation

The Tech Transformation practice focuses on helping CIOs deliver sustained value while staying ahead of the constantly changing technology landscape. Our offerings address a range of CIO challenges, by defining IT strategy and managing the business architecture to maximise the IT value delivered to business. The team specialises in working with leading global organisations in defining the future of their businesses – from strategy to execution, with technology enabled transformations and disruptions. The practice spearheads **Technology Transformation which enables Digital Transformation for large organisations** across industries (Consumer goods, Retail, Logistics, Financial Services & Insurance, Manufacturing and Supply Chain, Energy and Utilities etc.).

We are looking for candidates with IT experience, specifically in AI, cyber-security, ITSM and IT Strategy/M&A areas. **Our key offerings include:**

- **AI Driven Technology Strategy and Architecture:** Translate strategic, financial, and operational aspects into action, while transforming for an AI enabled future
- **AI Led Technology Modernisation & Cloud Advisory:** Formulating, optimising and executing effective cloud strategies & to modernise technology, eliminate tech debt and realise significant value
- **Mergers, Acquisitions & Divestitures:** Identify and realize synergies in combining or divesting technology portfolios.
- **Cybersecurity:** Develop strategies, roadmaps, and Operating model across domains including Maturity assessments, Identity & Access Management (IAM/IDAM), Zero Trust, Application Security, Infrastructure Security, Cloud Security, Third-Party Risk Management, and Enterprise Cyber Security Architecture.

We offer global engagement opportunities, invest in employee development and mindshare with talented top B-school hires on client-facing projects. When working with us, you can gain experience as an IT consultant, technology strategic consultant, product/project manager among other roles. We are looking for candidates from Information Technology background across industries.

Workforce Transformation

Learning Solutions Group

Learning Solutions Group (LSG) is part of the **Workforce Transformation (WX)** horizontal practice, with a focus on **Corporate Learning**. We operate at the intersection of **learning, digital technology, artificial intelligence, behavioural sciences, psychology, and neuroscience**. Our practice specialises in **designing and delivering comprehensive learning solutions that empower clients** to innovate in learning and drive successful user adoption for large-scale transformation programmes across geographies.

We are seeking individuals who are passionate about **organisational learning** and committed to fostering a **learning culture** within client organisations, while addressing global skilling challenges.

Our consultants bring a diverse set of skills and competencies that make a meaningful impact for our clients, including:

© 2026 Infosys Consulting

- **Training Needs Assessment**, **Curriculum Design**, **Training Management**, **Training Evaluation Frameworks**, **Learning Path Design**, and prior experience in **Content Creation** or related fields
- **Content Creation and Curation** for both synchronous and asynchronous learning, utilizing modern and traditional learning methodologies
- **Consulting for technology-enabled learning**, including platforms such as **LMS**, **LXP**, and other digital learning ecosystems
- **Competency Breakdown and Skill Decomposition**, enabling the development of skill matrices aligned with roles and proficiency levels

We are looking for a professional with strong consulting or IT services experience, excellent communication skills, and enterprise technology exposure. The ideal candidate should have an interest in instructional design, learning and development, and creating impactful learning experiences for global audiences.

Familiarity with ERP systems, content creation, design, data visualization, or Generative AI tools is an added advantage.

Organization Change Management (OCM)

Organisational Change Management (OCM) is all about managing **change** in a company. Think of it as the "people side of the change", we focus on helping employees successfully transition from their current way of working to a new one.

This change could be anything from a new IT system, implementation of AI, or a major shift in company culture or structure. We work with an organisation's leadership, from **directors to CXOs**, to figure out how the change will impact people. Our goal is to create a seamless transition for everyone involved, making sure employees can adapt smoothly to the new environment.

Essentially, we act as the bridge between the company's strategic goals and the people who will be living and breathing through the new processes every day. Our areas of expertise include:

- **Organisational Adoption:** Technology Enabled Transformation Adoption, Managed Services (Transition and Transformation), CaaS (Change-as-a-Service), ERP solution adoption (SAP, Oracle)
- **Digital HR:** Digital Process Optimization, Employee Experience, HR Automation and Analytics
- **Design Thinking:** We bring in a human-centred approach to change management where we combine some of the best practices from Design Thinking to engage with impacted stakeholder groups
- **C-suite Impact:** We are looking for self-motivated business consultants who will interact with the CXOs in organizations, with an ability to manage time & work on multiple engagements at the same time.

We are looking for a dynamic professional with strong consulting or IT services experience, excellent communication skills, enterprise technology expertise, and a proven track record of delivering value in global client environments.

We also appreciate candidates with a knack for data and design. Experience with tools such as **Power BI** for dashboarding and tracking **KPIs** is a major plus. Additionally, skills in creative applications such as **Adobe Illustrator, Photoshop, or Canva** are highly valued. As organizations increasingly adopt AI-enabled ways of working, candidates should be comfortable leveraging **Generative AI tools** (e.g., Microsoft Copilot, ChatGPT, Anthropic, Gemini) to drive productivity and support transformation initiatives.
